DETAILED ACTION

1. This action is in response to Applicant's request for continued examination. Claims 1-20 are amended. Claims 1-20 are presented for further examination.
2. This action is a non-final rejection.

Continued Examination Under 37 CFR 1.114

3. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/1/2008 has been entered.

Response to Arguments

4. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Specification

5. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the specification fails to provide proper antecedent basis for the term

"computer accessible medium" found in claims 12-19. Applicant should amend these claims to recite computer readable storage medium as described in Applicant's specification.

Allowable Subject Matter

6. Claims 1-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Independent claims 1, 12, and 20 are rejected because they lack proper antecedent basis:

- a. "the event port";
- b. "the command port."

Moreover, claims, 1, 12, and 20 contains unclear language. These claims recite, *inter alia*, a native language application opening event notification and function call streams "to the platform independent language application" on the event and command ports, respectively. The cited language is confusing because it is not clear whether the event and command port refers to a port at the native language or platform independent application.
